

## Case Study:

# High-Volume Resource Delivery for UK Nuclear Outages Clients:

**Resource Volume:** 50-200 skilled resources per outage

### Delivery Model:

- Short-term outage support delivered annually over several years.
- Our experienced team were engaged to support planned nuclear outages requiring the rapid mobilisation of large, multi-discipline workforces.
- Outages operated within fixed shutdown windows, making workforce availability critical to safe and timely plant maintenance and upgrade activities.
- Scope of Services Provision of electricians, mechanical fitters, riggers, and specialist operatives, supported by structured workforce planning, compliance management, mobilisation, and logistics coordination efforts.

### Results:

- Repeated annual delivery across multiple outages.
- Full labour coverage achieved without delay.
- Strong client retention and repeat engagement.
- Safe, compliant delivery within a regulated nuclear environment.
